

How to use Durokleen. The world's most advanced surface protection against harmful bacteria, odours and mould.

1. Understand the Product

Durokleen is neither a cleaning product nor a conventional bleach, acid or alcohol based poison. It is a modern, water-based and vastly improved surface protecting disinfectant that offers a superior performing, longer-lasting approach to the elimination and control of harmful pathogens. Safe to use and easy to apply, it emits no harmful fumes.

2. Read the User and Safety Instructions

Do not allow Durokleen to make contact with your eyes. Wash your hands and skin after exposure, and do not apply Durokleen to foodstuffs. If poisoning occurs, follow the Safety Instructions printed on the label and published overleaf. If necessary, consult a qualified medical practitioner.

3. How to apply Durokleen

Durokleen works by forming a powerful, long-lasting antimicrobial barrier on the treated surfaces. It may be applied to both hard and soft materials (such as leather or fabric) by spraying, misting, soaking or simply wiping on with a cloth.

1. Especially when treating a visible area, begin by first cleaning and, as far as practicable, drying the surface you wish to protect.
2. Apply Durokleen evenly over the entire surface you wish to protect, by spraying, soaking, misting or wiping.
3. Allow the treated surface to dry by exposure to the air, or by applying moderate heat.

4. What to expect from Durokleen

Unlike the short-term solutions offered by bleach, ammonia and alcohol, Durokleen destroys microbes by way of a physical and chemical interaction, then keeps on protecting your treated surfaces for up to 100 days.

- ✓ POWERFUL, LONG-TERM PROTECTION AGAINST ODOUR, INFECTION AND DISEASE CAUSING MOULD, MILDEW, ALGAE, BACTERIA AND VIRUSES
- ✓ SAVES YOU TIME, EFFORT AND THE CONTINUAL EXPENSE OF FREQUENTLY REPEATING CONVENTIONAL TREATMENTS.

DuroKleen®
LONG TERM ANTIMICROBIAL SOLUTIONS

SAFETY INSTRUCTIONS									
CAUTION:	The product causes moderate eye irritation. Avoid contact with eyes or clothing. Wear eye protection. Wash hands and exposed skin thoroughly with soap and water after handling and before eating, drinking, chewing gum, smoking or using the toilet.								
CHEMISTRY:	<table border="1"> <tr> <td>ACTIVE INGREDIENTS:</td> <td></td> </tr> <tr> <td>3-(trihydroxysilyl) propyldimethyloctadecyl ammonium chloride</td> <td>1.0%</td> </tr> <tr> <td>Hydrogen peroxide</td> <td>1.0%</td> </tr> <tr> <td>INERT INGREDIENTS:</td> <td>98.0%</td> </tr> </table>	ACTIVE INGREDIENTS:		3-(trihydroxysilyl) propyldimethyloctadecyl ammonium chloride	1.0%	Hydrogen peroxide	1.0%	INERT INGREDIENTS:	98.0%
ACTIVE INGREDIENTS:									
3-(trihydroxysilyl) propyldimethyloctadecyl ammonium chloride	1.0%								
Hydrogen peroxide	1.0%								
INERT INGREDIENTS:	98.0%								
FIRST AID:	If poisoning occurs, consult a medical doctor or call the Australian Poison Information Hotline 24/7 on 13 11 26. Have the container labels with you when telephoning or seeking medical treatment.								
IF IN EYES:	Hold affected eyes open and rinse gently with clean water for 15-20 minutes. If wearing contact lenses, remove them after rinsing eyes for 5 minutes, then continue rinsing eyes 10-15 minutes.								
STORAGE AND DISPOSAL:	Do not contaminate water, food or feed by inappropriate storage, use or disposal. Keep the product in its original container and re-seal carefully after use. The containers are not refillable. Store sealed containers at or below 25°C in a place that is not readily accessible to children or persons unfamiliar with the product's use. Dispose of empty container/s in accordance with local government regulations in a safe, appropriate manner, offering up for recycling if available.								
INSTRUCTIONS FOR USE									
PROTECTING ABSORBENT MATERIALS: WEBBING AND CLOTHING INCLUDING WASHABLE LINENS, WEARABLE MATERIALS, FABRIC, BEDDING AND APPAREL									
Colour fastness or fabric staining	If concerned, test a small, concealed area for fabric staining and colour-fastness by treating and drying prior to a wider application of the product								
Dipping/Soaking	Use a wash tub or machine for soaking items; treat clean items only and use clean, fresh rinse water								
Wash Tub	CLEAN THE ITEMS FIRST. Add 30ml of Durokleen to enough water to soak 2kg of fabric; 60ml for 4kg, etc. Submerge items in the Durokleen solution for 3 minutes, then remove and dry. Do not re-use the solution. Dry at room temperature or in a clothes dryer at the appropriate temperature setting								
Washing Machine	CLEAN THE ITEMS FIRST, then select the machine's Rinse Cycle. To treat the items, add 60ml of Durokleen for Small load settings; 90ml for Medium; or 120ml for Large. Run the full rinse cycle, then dry at room temperature, or else use a dryer at the appropriate temperature setting								
Spray application	FIRST CLEAN ALL VISIBLE SURFACES. Shake the container. Then, using the trigger pump or a pressure sprayer, spray the entire area to be treated with the nozzle 10-15cm from the surface, making sure that the surface is entirely and evenly covered. Let stand until dry or use a dryer at the appropriate temperature setting. If spotting occurs, wipe with a moist cloth or sponge. Reapply every 3 months or when odour, staining or discolouration returns due to bacteria, mould or mildew.								
PROTECTING CARPETS AND UPHOLSTERY OR FURNITURE:									
FIRST, CLEAN THE VISIBLE SURFACES TO BE TREATED. Shake the container. Then, using the trigger pump or a pressure sprayer, spray the entire area to be treated with the nozzle 10cm–15cm from the surface, ensuring the item is entirely and evenly covered. Let stand until dry. If spotting occurs, wipe with a moist cloth or sponge. Reapply every three months or when of if odour, staining or discolouration due to bacteria, mould or mildew returns.									
PROTECTING BATHROOM AND BUILDING SURFACES:									
FIRST, CLEAN THE VISIBLE SURFACES TO BE TREATED. Includes tubs, sinks and showers, vanity tops and drawers, shower curtains, grout and tiles, washable walls, wallpaper, walls, windowsills, stone or conglomerate surfaces, garbage cans, stainless steel and aluminium. Durokleen is formulated ready for use. Using the trigger pump or pressure sprayer, shake the container well and then spray the entire area to be treated with the nozzle 10cm - 15cm from the surface, making sure the surface is completely covered. Allow to dry thoroughly before use. If spotting occurs, wipe with moist cloth or sponge.									
PROTECTING FILTERS AND FILTER MATERIAL:									
FIRST, CLEAN THE VISIBLE ITEMS prior to treating. Includes air filters, vacuum cleaner and aquarium filters, etc. Durokleen is formulated ready for use. Using the trigger pump or pressure sprayer, shake the container well and then spray the area to be treated with the nozzle 10cm–15cm from the surface, making sure the surface is completely covered. Dry treated items thoroughly before use.									
ADDITIONAL SUPPORT AND PRODUCT INFORMATION									

Liquid Durokleen is available in the following packaged quantities: 750mL spray pump bottle, 5L, 20L and 200L containers — ideal for both domestic and commercial-scale applications.
